

# SVF Outperformance of Unadjusted GARCH Forecast

Each Square: Outperformance Proportion and (Simulation Count)

Number of Extra Measurement Days = 0

# SVF Outperformance of Unadjusted GARCH Forecast

Each Square: Outperformance Proportion and (Simulation Count)

Number of Extra Measurement Days = 1

# SVF Outperformance of Unadjusted GARCH Forecast

Each Square: Outperformance Proportion and (Simulation Count)

Number of Extra Measurement Days = 2

# SVF Outperformance of Unadjusted GARCH Forecast

Each Square: Outperformance Proportion and (Simulation Count)

Number of Extra Measurement Days = 3

# SVF Outperformance of Unadjusted GARCH Forecast

Each Square: Outperformance Proportion and (Simulation Count)

Number of Extra Measurement Days = 4
